

**AVKOPACK® 1205 /1/****CHARACTERISTICS**

Gland packing with guaranteed quality manufactured from high technology raw materials and yarns using up-to-dated production technology.

AVKOPACK® 1205 is braided from aramide yarn FINITEXT® and core of Glass fibers. The main material used for the production of this packing – aramide fiber – is a synthetic fiber characterized with excellent strength, extreme abrasive resistance and abrasive by itself.

**APPLICATION**

AVKOPACK® 1205 is specially produced for wire industry for polishing and cleaning the surface of wires.

**ADVANTAGES**

Due to the extreme strength and abrasive resistance of the aramide yarn AVKOPACK® 1205 is the best product for cleaning and polishing the wire, holding longer time than ever other products on abrasive application. Glass in the core gives temperature resistance and make the packing rigid enough for very good application.

**TECHNICAL PARAMETERS**

Working temperature:	-100 °C / +280 °C shock short temperatures 600 C
Density	760 g/m +/- 7%
pH:	2 – 12
Standard dimensions:	from 8 x 8 mm to 25 x 25 mm

**HEALTH HAZARD INFORMATION**

No harmful effects ascertained.

FINITEXT® is a trade mark of "FINISTRA" S.JSC

The information listed in this technical data sheet is based on our company's trials and experience. AVKO jsc is not to be held responsible for poor installation or application in media combining complexity of factors whose total exceeds the general qualities of the product. Our technical and sales representatives will assist any client in need of a product with a peculiar application.
