Construction:

Packing made from flexible (mineral) graphite impregnated with graphite powder and corrosion inhibitor. Each individual filament has Inconel wire mesh.

Properties:

High-performance valve packing dedicated in high-pressure and high-temperature steam service. Inconel wire mesh protect packing from being extruded. Special impregnated protect from corrosion and hardening. Packing does not show ageing processes.

Application area:

Packing is designed for the high duty steam service in the shut-down valves, applied also as the anti-extrusion rings.
